

Assignment 1: Project Plan Repository

Idea #1:

Draw Kirby standing still in front of a blank background. When the mouse or spacebar button is held down, draw Kirby with his mouth open and moving streams of air entering to look like his inhale animation.

Idea #1b:

If making the inhale animation is too difficult, holding the button draw Kirby in his blocking (defending) pose.

Idea #2:

Draw a small deserted island with a palm tree on it, and a man sitting under the palm tree. When the mouse is clicked, a coconut falls from the tree.

Idea #3:

Draw a genie lamp. When the mouse is moved repeatedly over the lamp, (at least 5 times in a short time frame), a genie appears.

Idea #4:

Draw an ocean and the evening, with the setting sun on the horizon line. When you click the mouse, the sun sets completely and the sky darkens to night.

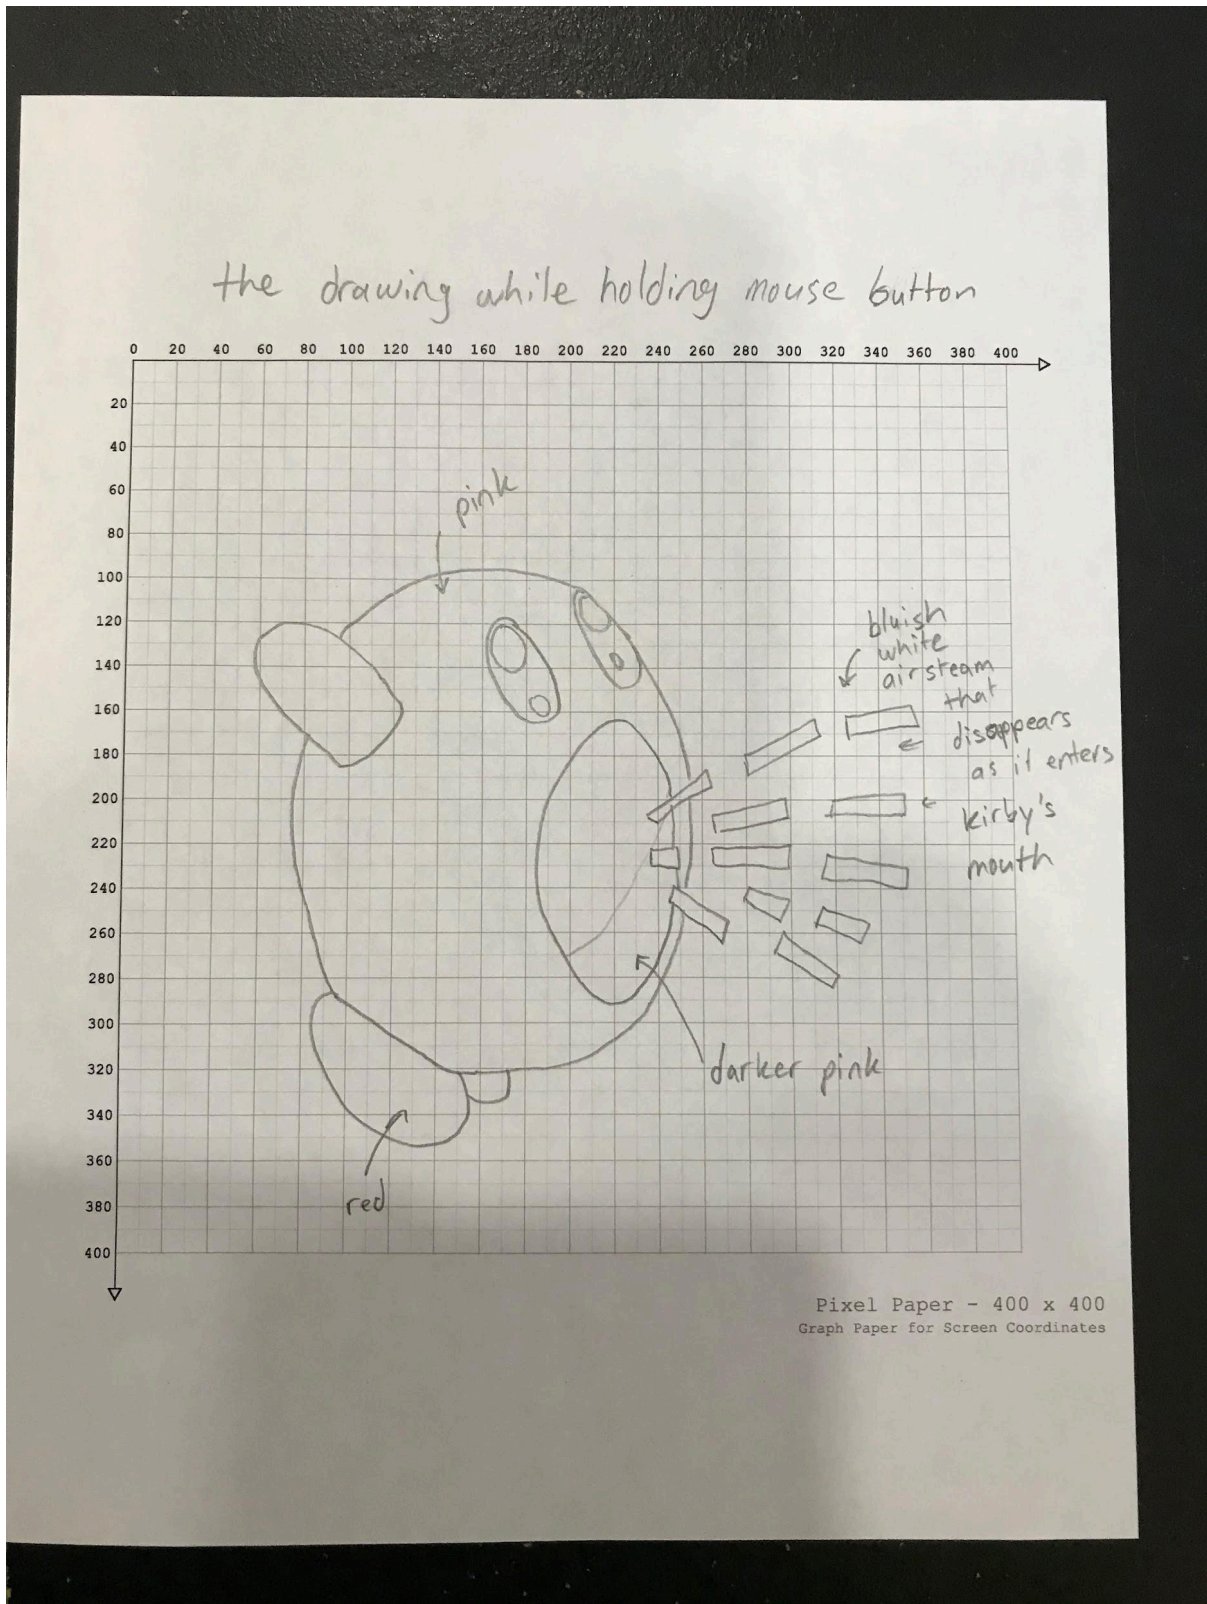

Idea #5:

A car, cart, or anything with wheels, drawn from the side view. When you move the mouse left or right, it moves back and forth along the ground.

Idea #6:

Draw the planets in our solar system in space. When the mouse button is held, the planets move in their orbit.
